DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

- 2. Claims 1-18 rejected under 35 U.S.C. 102(e) as being anticipated by Leong et al. U.S. Patent 6,269,398.
- 3. Referring to claim 1, Leong reference discloses a routing component that implements routing protocols for data processed by the router (col. 9, lines 33 through col. 10, lines 9); and an interface component through which a user may view and modify features of the router, the interface component presenting the features of the router to the user as a hierarchical tree having attributes that store values relating to the router protocols and components that represent functionality of the router protocols, the components containing one or more sub-components or attributes (Abstract; col. 5, lines 55-60; col. 6, lines 14-23; col. 2, lines 29-39; and col. 3, lines 63 through col. 4, lines 20).

.Application/Control Number: 09/540,534

Art Unit: 2143

4. Referring to claim 2, Leong reference discloses the interface component is accessible by a user through a command-line interface (col. 2, lines 29-39; col. 3, lines 63 through col. 4, lines 20; and col. 6, lines 24-28).

- 5. Referring to claim 3, Leong reference discloses the interface component is accessible by a user through a graphical interface (col. 3, lines 63 through col. 4, lines 20; and col. 6, lines 24-28).
- 6. Referring to claim 4, Leong reference discloses the interface component updates the router component in real-time to reflect changes made by the user to the attributes or the components (col. 12, lines 26-39).
- 7. Referring to claims 5, and 6, Leong reference discloses the router is a dedicated hardware router, and a general purpose computer (col. 6, lines 44 through col. 7, lines 15).
- 8. Referring to claims 7, and 13, Leong reference discloses organizing features relating to routing protocols of a router into a hierarchically formatted component tree (Fig. 4; col. 10, lines 17-23; and col. 11, lines 26 through col. 12, lines 19); presenting a portion of the hierarchically formatted component tree to a user in response to a first command from the user (col. 13, lines 23-37); modifying the component tree in response to a second command from the user (col. 14, lines 7-67; and col. 13, liens 12-39); and updating, in real-time, features of the router relating to the routing protocol that were changed by the user when modifying the component tree (col. 14, lines 40-67; and col. 12, lines 26-39).
- 9. Referring to claims 8, and 14 Leong reference discloses the hierarchical component tree includes attributes that store values relating to the routing protocols and components that

Application/Control Number: 09/540,534

Art Unit: 2143

represent functionality of the routing protocols, the components containing one or more subcomponents or attributes (fig. 4; and col. 12, lines 12-45).

- 10. Referring to claims 9, and 15 Leong reference discloses the first command is a display Command (col. 14, lines 22-41).
- 11. Referring to claims 10, and 16 Leong reference discloses the second command is a set preference command (col. 14, lines 6-67).
- 12. Referring to claims 11, and 17, Leong reference discloses the user inputs the first and second commands via a command-line interface (col. 2, lines 29-39; col. 3, lines 63 through col. 4, lines 20; col. 6, lines 24-28; and col. 14, lines 9-15).
- Referring to claims 12, and 18, Leong reference discloses the user inputs the first and second commands via a graphical interface (col. 3, lines 63 through col. 4, lines 20; col. 6, lines 24-28; and col. 14, lines 7-67).

Conclusion

14. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Antur et al. U.S. Patent 6,212,558 discloses method and apparatus for configuring and managing firewalls and security devices.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuoc H. Nguyen whose telephone number is 703-305-5315. The examiner can normally be reached on Mon -Thu (7AM-4:30PM) and off every other Friday.

Application/Control Number: 09/540,534

Art Unit: 2143

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David A Wiley can be reached on 703-308-5221. The fax phone numbers for the organization where this application or proceeding is assigned are 703-746-7239 for regular communications and 703-746-7238 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3900.
